Retrieved 2017-01-09 end of the road for the dopso the top bar stays and the vertical midi keyboard stays along the left but that whole editing window section and the wav editing section, it all just goes solid grey whenever there's a screen flash every oh its at least every minute.

Your track record of customer, (that's people who give you \$\$ for quality products and customer service) service seems non-existent except for your readiness to push other products on us. Anyways guys "The Art of Producing" After our trial and test, the software is proved to be official, secure and free. Hard time finding drivers to just get noise. Hello all, I thought I'd give you my solution: 1) You need to open Regedit on your pc. Meanwhile for making music I'd take samples and make soundfonts with them and place midi dots instead of wav.
